

AZZ | Central Electric provides quality electrical solutions to Utility and Industrial customers, both domestically and internationally. Our Licensed Professional Engineering team will ensure that the project specifications are established, defined and implemented, all beyond your expectations. Our extensive experience in the electrical engineering and design field will help guide your project firmly down the path to success. Our reliability, expertise, and flexibility are cornerstones for the quality and value of your project, and ultimately your satisfaction.

Without a doubt, engineering remains the most important aspect of your project. It is during this phase that all functional details are designed and the framework for success is established. Our team will also establish a strong foundation for adherence to all codes and safety issues. We keep a constant focus on training our engineers and staying updated on the latest trends in UL, CSA, NFPA, OSHA,

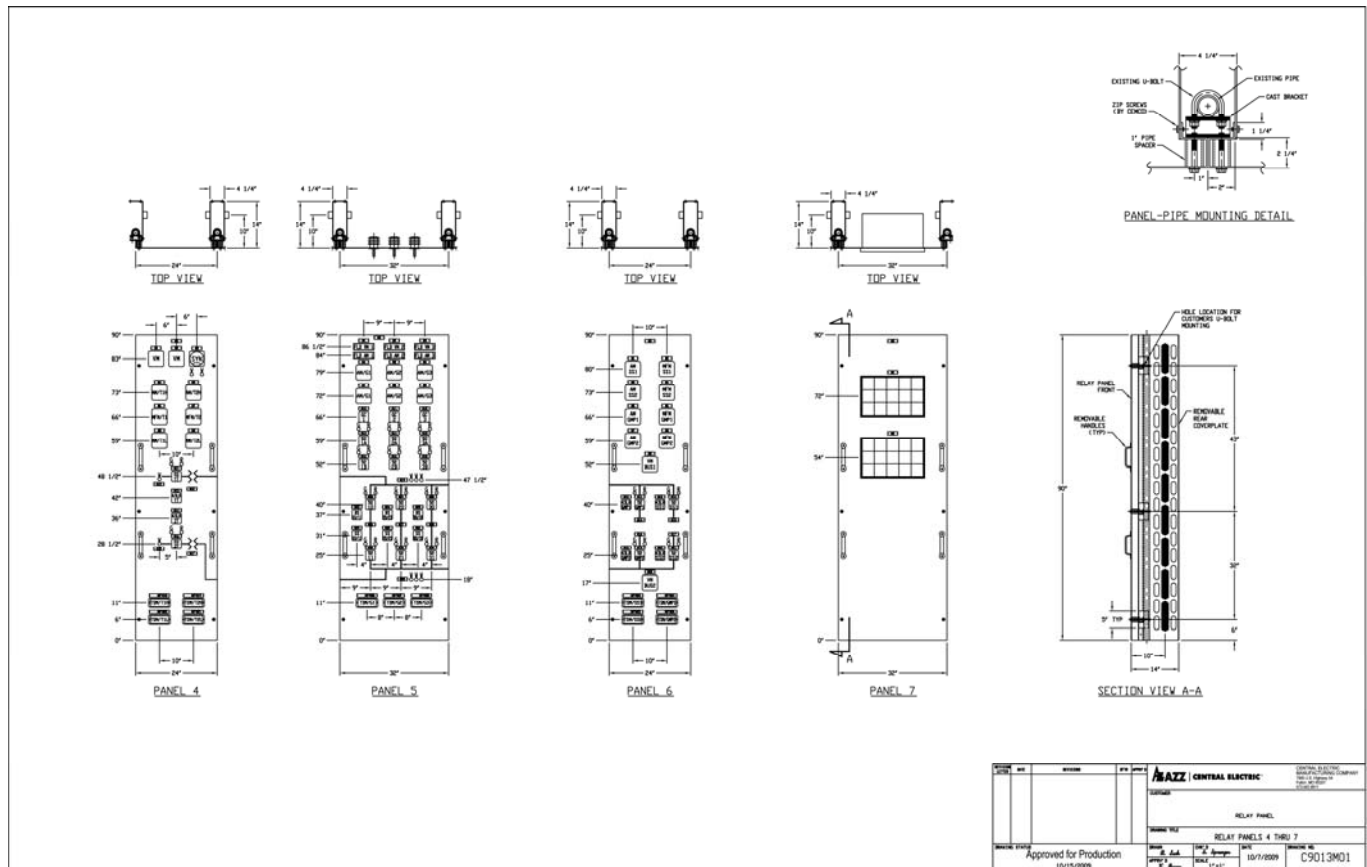

IEEE and other standards, codes or safety regulations. Our strong focus on these standards and codes means your team can turn their attention to what is really important; the overall success of your organization.

AutoCAD & Micro Station	SCADA / RTU	Complex Testing
Schematics & Elementaries	Protection Schemes	Commissioning
Detailed Documentation	ARC Flash Studies	
I/O Wiring Diagrams	Short Circuit Analysis	

Whether creating building designs to fit in available space or providing custom circuits for protection and control, our engineers have a committed focus to your project needs. We can help bring your engineering from concept to reality; getting involved anywhere in the process that you need help. We regularly convert one-line drawings into three-line drawings, and continue through schematics, elementaries and point-to-point drawings.

ENGINEERING

Experienced application specific Engineers, vast levels of experience, and a focus on your needs; this is what qualifies us to be your solutions provider. We understand the importance of your project, and will not take your trust lightly. When your project is important, why would you want to take chances. We invite you to experience the difference success and experience make, especially in technology. Please contact us today to start the consultation process with our Engineering Team.

AZZ | Central Electric is a proud member of the AZZ Electrical Products Group. AZZ incorporated is a specialty electrical equipment manufacturer serving the global markets of power generation, transmission and distribution, and industrial automation markets and is a leading provider of hot dip galvanizing services to the steel fabrication market nationwide. AZZ incorporated is NYSE listed under the symbol AZZ.
